

THE VET'S
BEST FRIEND.

Gratnells

Everything in its place.

Gratnells storage trolleys are an ideal storage solution for any veterinary practice or animal hospital. They're so versatile, they can follow me and the patient around the entire facility. Theatre, radiography, the dental suite...wherever the patient is, there's a trolley right behind. This clean, efficient and organised system carries all the materials I need.

What's more, the integrated storage trays can be colour-coded with inserts to separate needles, syringes and catheters. Larger storage trays hold a patient's surgical kit...in fact, everything we require for their planned procedures. And with Gratnells Antimicrobial System protection, I know our practice has excellent levels of hygiene.

Quite simply, there is nothing else on the market that does it all so well as Gratnells.

Louise Ketteridge BVetMed MRCVS
Oak Barn Vets, Surrey

TAKE YOUR VETERINARY STORAGE TO THE NEXT LEVEL.

We're Gratnells. And we're the vet's best friend.

That's because we want to help make your veterinary practice, hospital or referral centre more efficient, effective and profitable.

How do we do this? By providing you with our integrated storage system which saves you time, space and money.

What's more, our range of antimicrobial storage frames and trolleys offer up to 99.9% of reduction in surface bacteria.

The result? You have a safer, more hygienic veterinary environment for you and those in your care.

So when it comes to raising the level of veterinary storage, we're here for you.

After all, isn't that what friends are for?

The NHS saved £1 million in nursing time by investing in modern storage. How much effort do you waste when something you need isn't at hand?

A PLACE FOR EVERYTHING. AND EVERYTHING IN ITS PLACE.

How much time do you and your veterinary staff spend looking for something in your consulting room or preparation room, only to find it in the back of a drawer or a dusty shelf?

If that's the case, it could be costing your veterinary practice dearly when there is an emergency and the drug or device needed isn't immediately at hand.

It needn't be that way. Our professional storage system is perfect for storing supplies and equipment. The robust, heavy-duty frames, trolleys, trays and baskets all work together to provide a complete, integrated storage solution.

If you want to reduce preparation time, speed up patient recovery and improve stock control, the Gragnells Veterinary Storage System is for you.

It doesn't matter how large or small your veterinary practice, referral centre or animal hospital happens to be, efficient storage can make a big difference to your patients – and your profits.

SETTING THE STANDARD IN HYGIENE AND ANTIMICROBIAL PROTECTION.

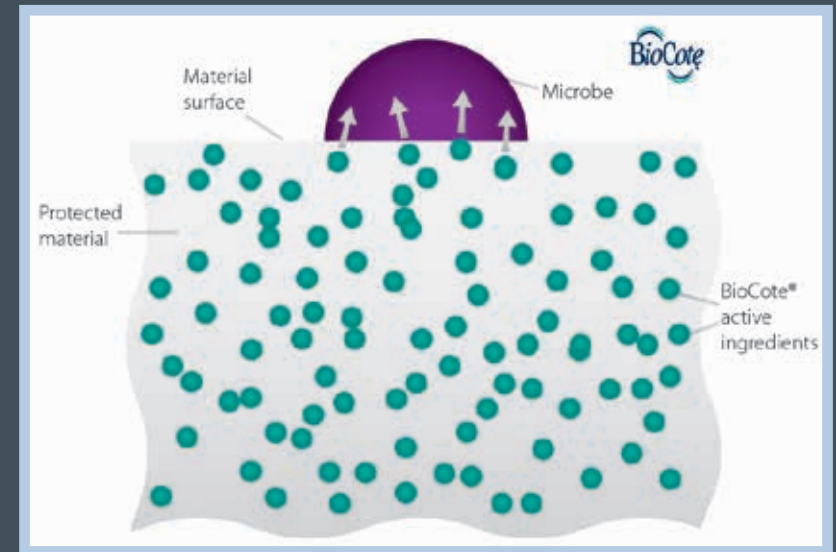

PROTECTED

Protection against the dangers of bacteria and fungi is of paramount importance to any practice. That's why we've created the Gratnells Antimicrobial System.

Now, all the frames and trolleys – and even the trays – in our range are treated with antimicrobial additive.

This means surfaces need no longer rely solely on continual washdowns to guard against infection.

With Gratnells veterinary products, you get long-lasting protection because antimicrobial surfaces are places where microbes simply cannot survive.

The Gratnells Antimicrobial System is the result of our strategic partnership with BioCote®, globally recognised as a guarantee of superior antimicrobial performance.

All of our antimicrobial products are independently certified for antimicrobial efficacy on a regular basis and can boast a rating of 99.9%.

It's something we believe has never before been seen in the veterinary profession.

And that's why Gratnells products are your best defence in the war against infection.

Lower levels of bacteria means improved hygiene, and reductions in staining, odours and premature degradation of materials. BioCote® technology is proven effective against a wide range of bacteria, fungi & the H1N1 virus.

We've been using a Gratnells trolley for some time now and been thoroughly impressed by its flexibility, convenience, and most importantly, build quality.

In spite of daily cleaning with disinfectant, and the lumps and bumps of everyday staff and student use, it still looks like it just came out of the box!

The Gratnells trolley is highly popular with the staff and very useful in our day-to-day work, and we're very glad to have it!

Mark B. Hedberg DrMedVet MRCVS
Short Course Manager

CLASSIC AND COMPACT. OUR TWO FLEXIBLE STORAGE RANGES.

Whether it's large frame capacity for your sterile storage area, or storage trolleys for use throughout your practice, we offer two flexible storage ranges: **Classic** and **Compact**.

Our **Classic** range of products became the leading storage system for the NHS over 40 years ago, with veterinary practices and hospitals following suit. At the heart of the system is our range of trays, baskets and tray inserts, all of which give you a multitude of storage options.

Many veterinary practices and hospitals are often stuck for space. So we launched the **Compact** range consisting of smaller trays, frames and trolleys which are perfect for tighter areas.

Each item is fully interchangeable within each **Classic** or **Compact** range, delivering time-saving, efficient and effective storage built around your practice requirements.

CLASSIC Lockable Drugs Trolley

CLASSIC Resuscitation Trolley

CLASSIC Anaesthetics Trolley

COMPACT Crash Trolley

COMPACT Bandaging Trolley

A FULL RANGE OF MOBILE AND STATIC STORAGE.

COMPACT Prep Trolley

CLASSIC Supplies Trolley

CLASSIC 2-Column Trolley

CLASSIC Wide Shelved Trolley

CLASSIC 1-Column Shelving Frame

CLASSIC 2-Column Tray Frame

CLASSIC 2-Column Shelving Frame

CLASSIC Wide Shelving Frame

BEST PRODUCTS AND BEST VALUE FROM US. BEST PRACTICE FOR YOU.

What you see on these pages is just a small sample of the wide range of products in the Gratnells Veterinary Storage **Classic** and **Compact** ranges. Designed to give you a totally integrated storage system that suits you and your veterinary practice. But that's not all. We've a wide range of accessories, including stainless steel tops, tray lids, tray dividers and inserts and other optional extras such as oxygen cylinder holders.

And, if you can't find exactly what you're looking for in our ready-made **Classic** or **Compact** trolley and storage sets, simply start from an empty trolley and frame and build your own.

COMPACT 2-Column Basket Set

CLASSIC Dispensary Tray and Shelf Unit

CLASSIC 6-Shelf Unit

COMPACT 3-Column Pharmacy Frame

CLASSIC 2-Column Dispensary Frame

At Willows we use a large selection of Gratnells trolleys throughout the hospital (from our surgical suite to the recovery areas). There are several reasons we choose to use Gratnells time and time again.

Firstly, placing the initial order is easy and the friendly staff at Gratnells are happy to visit and assist in measuring and creating the trolley which suits you and your specifications. Secondly, because you can build the trolleys to your own specification it means that the trolley is designed perfectly, fitting all your needs. As you can see from the picture of our busy surgical preparation room we have a patient trolley on wheels which moves with ease from each patient preparation table.

Thirdly, the drawers are easy to clean and the dividers make organisation easy. Being a busy practice it is also important to us that the trolleys are robust. The range of Gratnells trolleys suits all of our needs and we would certainly recommend these to others.

Amy Bowcott RVN Dip AVN (Surgical)
Assistant Nurse Manager (Surgical)
Willows Referral Service, Solihull

HAVE SOME QUESTIONS? HERE ARE SOME ANSWERS.

Q. Do your storage frames and shelving systems integrate with your trolleys, trays and baskets?

A. Yes. The Gratnells range is designed as an integrated storage system, so everything fits everything else, within the respective **Classic** or **Compact** range. That means, for example, an individual patient's surgical kit can be pre-prepared on a tray in the morning, left on a storage rack until it's time for the operation, then slotted straight into one of our trolleys to be wheeled into the operating theatre.

Q. Can I buy exactly what I need?

A. Yes. There is no minimum order or a requirement to buy a 'set' of frames, trays and trolleys. Frames can be bought empty or pre-installed with the trays and baskets you need. Or any combination in-between. If a single trolley is all you need, we can provide that for you. Just go to our website at www.gratnellsveterinary.com to see the full range on offer.

Q. I have a one-person veterinary practice. Do you have a system that fits into a very small space?

A. Yes. And while many Gratnells products are great at optimizing space, our Compact range is specially made for tighter spaces or awkwardly shaped rooms.

Q. I'm not sure exactly which tray combinations I need. Can you help?

A. Yes. We can help you decide the kind of tray combinations that will suit your specific requirements. We can also tell you exactly how many different sized tray combinations will fit our frames. Just call our Customer Service Team on Freephone 0800 849 1105 or email us at info@gratnellsveterinary.com to talk with one of our friendly advisors.

Q. Where are your products made?

A. We are a family owned business, located in Harlow, Essex. Our products are manufactured in our own UK-based 10,000^m2 high-tech factory.

Q. Do you have all the storage accessories I need?

A. Yes. We know that no two veterinary practices are the same, so we've designed our flexible storage systems based on feedback we've had from users in healthcare over four decades.

For example, we've a range of plastic tray inserts and dividers that enable you to hold small items safely in place, and we've locks, castors, brakes and bumpers too.

There are oxygen cylinder holders, linen or plastic trolley covers and sharps box containers...whatever you think you'll need, we're sure to have thought of it. You can view and purchase the full range of accessories on our website: www.gratnellsveterinary.com.

STORAGE PLANNING FOR MAXIMUM EFFECTIVENESS.

Whether you're planning a refurbishment of practice buildings, the conversion of an existing property to fit its new veterinary role, or the construction of a completely new building, it's important to get everything right from the start. That's where Gratnells can help.

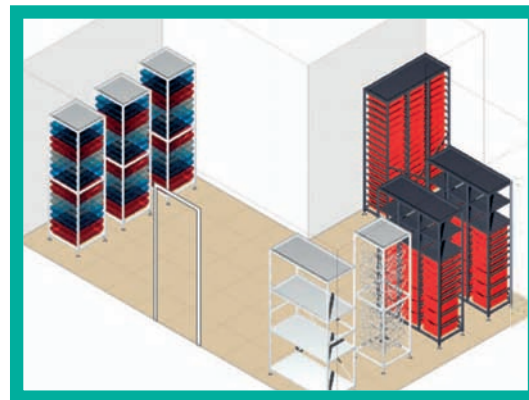

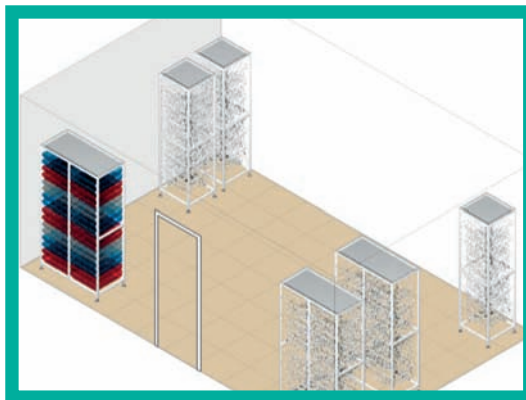

We provide a design and measure service for any veterinary practice that wants to begin life in its new or upgraded building with the ideal storage solution in place.

Our storage planning advisors can guide you through your storage requirements and help you to determine the optimal combination of frames and trolleys that suits your practice's storage

needs. This will ensure that your space is used to its best advantage, even if you have one of the more unusual buildings that have been converted into veterinary surgeries over the years.

Following a free appointment and assessment, we will prepare a no-obligation proposal, incorporating all plans and costs – at no charge to you.

Once you've created the perfect plan, the Gratnells Customer Services team is available to help you with all of the little extras, such as trolley attachments and tray inserts – ensuring you have what you need to find a place for everything in your practice.

- FREE EXPERT PLANNING.
- FREE FLOOR PLAN RECOMMENDATIONS.
- FREE COMPREHENSIVE QUOTATION.
- NO OBLIGATION TO BUY.
